

RAYA SESAN FIRDAUS

Informatics Engineering Student | Data Science, Machine Learning & AI

rayasesan@gmail.com | (+62) 813-9811-6769 | Jakarta, Indonesia
linkedin.com/in/rayasesann | github.com/rayasesan | rayasesan.vercel.app

PROFESSIONAL SUMMARY

Informatics Engineering student focused on data science, machine learning, AI application development, computer vision, predictive modeling, and backend AI integration.

Built predictive models, computer vision systems, and end-to-end machine learning workflows across data preparation, feature engineering, model evaluation, API integration, and deployment.

Completed 934 hours of AI Engineering training with Distinction and achieved 92.44% model accuracy in Nutrify, using Python, TensorFlow, scikit-learn, FastAPI, SQL, Power BI, and Streamlit.

EXPERIENCE

Backend AI Engineer Intern

FlyRank AI | Jul 2026 - Aug 2026

- Developed backend components for AI-powered applications, supporting API integration, automation workflows, and scalable application structure.
- Integrated backend logic with AI application workflows to support structured data and request handling between services.

AI Engineer Program Graduate - Distinction

Coding Camp 2026 powered by DBS Foundation x Dicoding | Feb 2026 - Jul 2026

- Completed 934 hours of structured AI Engineering training covering Python, machine learning, deep learning, generative AI, Git, and professional development.
- Contributed as AI Engineer on Nutrify by developing the food classification pipeline and preparing model training and evaluation workflows.
- Supported backend model serving and Gemini-based nutrition recommendation integration for the capstone application.

Machine Learning Cohort

Asah - Dicoding x Accenture | Sep 2025 - Jan 2026

- Developed machine learning workflows covering data cleaning, exploratory data analysis, feature engineering, model training, and model evaluation.
- Translated model evaluation results into business-oriented interpretation for machine learning use cases.

Laboratory Assistant

Gunadarma University | 2024 - Present

- Assisted students during practical computing laboratory sessions by supporting technical exercises and troubleshooting.
- Strengthened technical communication, mentoring, and problem-solving skills through recurring laboratory support.

PROJECTS

Nutrify - AI-Powered Nutrition Platform | Python, TensorFlow, FastAPI, Gemini API, Computer Vision

- Developed an AI platform for Indonesian food image recognition using transfer learning with TensorFlow, achieving 92.44% model accuracy.
- Integrated FastAPI model serving and Gemini API to support nutrition recommendation flows within the application.

Customer Churn Prediction | Python, Pandas, Scikit-learn, Classification

- Built a churn classification workflow from 7,043 customer records using data cleaning, EDA, feature engineering, and scikit-learn.
- Evaluated model performance and selected Logistic Regression as the best model with 84.26% ROC-AUC.

Credit Risk Prediction | Python, Scikit-learn, Classification, Model Evaluation

- Developed supervised credit risk classification models to estimate borrower risk categories.
- Compared models and selected Random Forest as best with 93.23% accuracy and 93.11% ROC-AUC.

Public Service Sentiment Analysis | Python, Scikit-learn, TF-IDF, LinearSVC, Multinomial Naive Bayes, Streamlit

- Built a Streamlit web app for Indonesian public service review sentiment classification from Google Maps data.
- Implemented preprocessing, TF-IDF feature extraction, and compared Multinomial Naive Bayes with LinearSVC.

SKILLS

Programming Languages: Python, SQL

Machine Learning: Scikit-learn, TensorFlow, Classification, Model Evaluation, Feature Engineering, Computer Vision, Natural Language Processing

Data Analysis and BI: Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Power BI, SQLite

Backend and Deployment: FastAPI, Streamlit, API Integration, Model Serving

Tools: Git, GitHub, Jupyter Notebook, Google Colab, TensorBoard

Soft Skills: Problem Solving, Technical Communication, Team Collaboration, Adaptability

EDUCATION

Bachelor of Informatics Engineering

Gunadarma University | Sep 2023 - Present

CERTIFICATIONS AND AWARDS

- Coding Camp 2026 - AI Engineer Learning Path, DBS Foundation x Dicoding - Distinction Graduate, 2026
- 3rd Best Team - Machine Learning Path, GDG on Campus Gunadarma, 2026
- Asah Machine Learning, Dicoding x Accenture, 2026
- Productivity with AI Bootcamp, Badan Ekraf Digital Talent x Dicoding, 2026

LANGUAGES

Indonesian - Native; English - TOEFL Score 580
