SUMMARY

Informatics Engineering student focused on Data Science, Machine Learning, and AI-powered applications. Experienced in building end-to-end projects across predictive modeling, SQL analytics, Power BI dashboards, and computer vision through Nutrify, an AI nutrition platform using TensorFlow, FastAPI, and Gemini API. Seeking Data Science, Machine Learning, or AI Engineering internship opportunities.

SELECTED HIGHLIGHTS

- Built 5 portfolio projects across AI/ML, SQL analytics, and business intelligence with public repositories and a live portfolio.
- Delivered Nutrify capstone as AI Engineer: TensorFlow food classification, FastAPI model serving, Gemini AI nutrition coach, and 92.44% model accuracy.
- Recognized as Coding Camp 2026 Distinction Graduate and 3rd Best Team for Machine Learning Path at Compete Mate Bootcamp.

EXPERIENCE

AI Engineer Graduate with Distinction

Feb 2026 - Jul 2026

Coding Camp 2026 powered by DBS Foundation x Dicoding

- Completed 934 hours of structured AI Engineering training covering Python, machine learning, deep learning, Generative AI, Git, and professional development.
- Contributed as AI Engineer to Nutrify by integrating computer vision, TensorFlow model serving, FastAPI APIs, and a Gemini-based nutrition coach.
- Delivered an Indonesian food classification pipeline with 92.44% model accuracy and backend-ready inference flow.

Machine Learning Cohort

Sep 2025 - Jan 2026

Asah - Dicoding x Accenture

- Built end-to-end ML workflows covering data cleaning, exploratory data analysis, feature engineering, model training, evaluation, and interpretation.
- Applied Scikit-learn and Python-based analysis to structured data problems with business-oriented conclusions.

Laboratory Assistant

2024 - Present

Gunadarma University

- Assisted students during practical computing laboratory sessions, helped troubleshoot technical exercises, and supported laboratory operations.
- Strengthened communication, mentoring, and technical problem-solving skills through recurring student support.

PROJECTS

Nutrify - AI-Powered Nutrition Platform | Python, TensorFlow, FastAPI, Gemini API, Computer Vision

- Built Indonesian food recognition and nutrition recommendation features; achieved 92.44% model accuracy and connected model inference with FastAPI and Gemini-based recommendations.

Customer Churn Prediction | Python, Scikit-learn, Pandas

- Analyzed 7,043 telco customers, selected the best model with 84.26% ROC-AUC, and generated retention insights.

Credit Risk Prediction | Python, Classification Models

- Selected Random Forest with 93.23% accuracy and 93.11% ROC-AUC for borrower risk classification.

Bank Marketing SQL Analytics | SQL, SQLite

- Analyzed 45,211 campaign records across 6 business questions using CTEs, window functions, CASE WHEN, and GROUP BY.

Telco Customer Churn Dashboard | Power BI

- Designed PBIX dashboard with 3 KPI indicators and 4 churn visualizations by contract, internet service, payment method, and tenure group.

EDUCATION

S1 Informatics Engineering

Sep 2023 - Present

Gunadarma University

- Active in campus technology communities and practical computing activities.

SKILLS

Programming Languages : Python, SQL
Data Science & ML : Pandas, NumPy, EDA, Feature Engineering, Data Cleaning, Scikit-learn, TensorFlow, Classification
Business Intelligence : Power BI, KPI Development, Dashboard Design, SQLite
Tools & Backend : FastAPI, Git, GitHub, Jupyter Notebook, Google Colab, TensorBoard
Soft Skills : Problem Solving, Technical Communication, Team Collaboration, Adaptability

CERTIFICATIONS & AWARDS

- Coding Camp 2026 - AI Engineer, DBS Foundation x Dicoding - Distinction Graduate
- 3rd Best Team - Machine Learning Path, GDG on Campus Gunadarma - 2026
- Asah Machine Learning, Dicoding x Accenture - 2026
- Productivity with AI Bootcamp, Badan Ekraf Digital Talent x Dicoding - 2026
- TOEFL 580, Brighten English - valid until Nov 2027

SELECTED LINKS

- Portfolio: rayasesan.vercel.app - project case studies, credential links, and downloadable CV.
- Nutrify live demo: nutrify.biz.id - AI nutrition platform with food scanner and recommendation flow.
- GitHub ML repositories: [customer-churn-prediction](#) and [credit-risk-prediction](#).
- GitHub analytics repositories: [bank-marketing-sql-analysis](#) and [telco-customer-churn-dashboard-powerbi](#).

TARGET ROLES

- Data Science Intern, Machine Learning Intern, AI Engineer Intern, or Data Analyst Intern roles.
- Interested in predictive modeling, dashboard analytics, computer vision, AI backend integration, and applied ML projects.
