

CC26/DIST/XXVI-07/CACC009D6Y2066

CERTIFICATE OF COMPLETION

is proudly presented to

RAYA SESAN FIRDAUS

for successfully completing **Coding Camp 2026 powered by DBS Foundation, specializing in AI Engineer**, with **Distinction**.

Coding Camp is a highly selective IT training program, developed in collaboration between DBS Foundation and Dicoding, designed to equip individuals with essential technical, financial, English, and soft skills for success in the workforce.

Program Period: February 9, 2026 - July 20, 2026

July 21, 2026

Narenda Wicaksono

Chief Executive Officer
Dicoding Indonesia

Mona Monika

Head of Group Marketing & Communications
PT Bank DBS Indonesia

STUDENT LEARNING ACHIEVEMENT

Cohort ID : CACC009D6Y2066
Name : Raya Sesan Firdaus
University : Universitas Gunadarma

Completion Status : Full Graduated
Learning Path : AI Engineer
Capstone Status : Completed

No	Courses/Specialization/Activities	Learning Outcome	Hours	Score (0-100)	Score Description
1	Basic Programming for Software Developers	By the end of the course, students are able to modify software applications using flowchart guidelines and program using basic HTML, CSS, and JavaScript in accordance with the application's specifications and functionality requirements.	9	96	Students are excellent in modifying software applications using flowchart guidelines and programming with HTML, CSS, and basic JavaScript in accordance with application specifications and functional requirements.
2	Programming Logic 101	By the end of the course, students are able to explain basic programming logic and apply it to solve problems encountered in the field of software development.	6	92	Students are excellent at explaining basic programming logic and applying it in problem-solving within the Software Developer field.
3	Basic Git and Github	By the end of the course, students are able to manage their own code/data collections in a GitHub repository. Students are also able to collaborate with other developers within the same repository.	15	96	Students demonstrate excellent proficiency in managing their own code/data collections in a GitHub repository. Students are also able to collaborate effectively with other developers within the same repository.
4	Basic AI	After completing the course, students are able to understand the fundamental concepts of AI in everyday life through the implementation of AI.	10	90	Students are excellent in understanding the fundamental concepts of AI in everyday life through the implementation of AI.
5	Programming with Python	By the end of the course, students are able to build Python programs using various IDEs such as Visual Studio Code, Jupyter Notebook, and Google Colaboratory.	60	96	Students are excellent in building Python programs using various IDEs such as Visual Studio Code, Jupyter Notebook, and Google Colaboratory.
6	Machine Learning for Beginners	After completing the course, students are able to build traditional machine learning models (supervised and unsupervised learning) using tabular data.	90	96	Students are excellent in building traditional machine learning models (supervised and unsupervised learning) using tabular data.
7	Deep Learning Fundamentals	After completing the course, students are expected to build deep learning projects focused on text and image processing and prediction.	110	91	Students are excellent in building deep learning projects focused on text and image processing and prediction.
8	Build Advanced Deep Learning Projects	After completing the course, students are expected to build advanced deep learning projects covering custom training, computer vision, NLP, time series, and recommendation systems.	90	96	Students are excellent in building advanced deep learning projects covering custom training, computer vision, NLP, time series, and recommendation systems.
9	Capstone / Final Project	Students are able to complete the final project, namely the development of an application/solution that is done to facilitate product development skills and add to the portfolio.	250	95	Students are excellent in completing the final project, which involves developing an application/solution to validate product development skills and enhance their portfolio.
10	Soft Skills & Career Development	Students are able to apply the materials related to personal development, communication, networking, and interview preparation.	294	93	Students are excellent in applying soft skills related to personal development, communication, networking, and interview preparation.
